

REMARKS

Office Actions received in related patent applications has revealed that Applicant has depicted specific nucleotide sequences of more than 10 nucleotides in length in Figures 3, 6 and 7, without having the required appropriate sequence identifiers and required appropriate identification in the figures or the figure legends. It has also been revealed that the sequences in Figures 3, 6, and 7 have been inadvertently omitted from the Sequence Listing filed on September 24, 2003.

Applicants herewith submit a Substitute Sequence Listing in computer-readable format, listing the sequences present in Figures 3, 6, and 7 not previously listed in the Sequence Listing of September 24, 2003, and revised Figures 3, 6 and 7 containing the appropriate sequence identifiers. No new matter is added.

In view of the above amendment, applicant believes the pending application is in condition for allowance.

Dated: June 30, 2008

Respectfully submitted,

By /Raj S. Dave/
